## Ethical Considerations with Individuals Experiencing Substance Use Disorders

**1. Which code of ethics specifically advises against engaging in dual or multiple relationships with clients to prevent the risk of exploitation?**

- A. American Psychological Association (APA) Ethical Principles
  - B. National Association of Social Workers (NASW) Code of Ethics
  - C. American Counseling Association Code of Ethics
  - D. National Association of Alcohol and Drug Abuse Counselors (NAADAC) Code of Ethics
- 

**2. In the context of an ethical dilemma involving boundary crossings, which of the following actions might indicate a warning sign?**

- A. Maintaining professional objectivity during sessions
  - B. Increased frequency of sessions for better therapeutic outcomes
  - C. Engaging in purposeful outside contact with the client
  - D. Receiving supervision and consultation regularly
- 

**3. What is a significant difference between boundary crossing and boundary violation in a therapeutic setting?**

- A. Boundary crossings are always illegal and harm the client.
  - B. Boundary violations involve meeting a personal need at the client's expense, often harmfully.
  - C. Boundary crossings require the same level of scrutiny and response as violations.
  - D. Boundary violations occur accidentally whereas boundary crossings are deliberate.
- 

**4. What is NOT a recommended consideration when deciding to engage in dual relationships according to Dewane's typology?**

- A. Assessing how the relationship might change power dynamics in therapy.
  - B. Evaluating cultural sensitivity to the dual relationship.
  - C. Ignoring the legal ramifications of entering into a dual relationship.
  - D. Determining the impact of ending one relationship on another.
- 

**5. In terms of professional boundaries, which course of action is suggested when attending the same 12-step group as a client?**

- A. Avoid the meeting to prevent any dual relationship issues.
- B. Engage fully in the meeting without considering the risks.

- C. Choose strategically what to share to maintain some boundaries.
  - D. Consult the client to determine their comfort level with your presence.
- 

**6. Which of the following ethical principles is directly concerned with allowing each person to make their own choices in substance use treatment?**

- A. Beneficence
  - B. Autonomy
  - C. Justice
  - D. Fidelity
- 

**7. What distinguishes substance use disorder ethics from other clinical ethics according to the course content?**

- A. Impairment in decision-making capacity
  - B. The complexity of neurobiology and habitual behavior
  - C. The universal effectiveness of a single treatment modality
  - D. The societal perception of substance use as a moral failure
- 

**8. Which term should be used to refer to individuals to help reduce stigma, as recommended in the course?**

- A. Substance abuser
  - B. Addict
  - C. Person with a substance use disorder
  - D. Dirty urine
- 

**9. How does the DSM-5-TR (2022) categorize the severity of substance use disorders?**

- A. Mild: Two or fewer symptoms, Moderate: Three or four symptoms, Severe: Five or more symptoms
  - B. Mild: One or two symptoms, Moderate: Three or four symptoms, Severe: Five or more symptoms
  - C. Mild: Two or three symptoms, Moderate: Four or five symptoms, Severe: Six or more symptoms
  - D. Mild: Three or fewer symptoms, Moderate: Four to six symptoms, Severe: Seven or more symptoms
- 

**10. When addressing substance use disorder stigma, what is a consequence of using non-medical terminology?**

- A. Decreases prognostic optimism
  - B. Reduces perceived danger and social exclusion
  - C. Increases blame for opioid impairment
  - D. Enhances treatment and recovery engagement
-

**11. According to the course content, what is a major ethical challenge in addressing substance use disorders?**

- A. Ensuring confidentiality is maintained even when it violates the law
  - B. Deciding whether to disclose confidential information as required by law
  - C. Balancing beneficence and nonmaleficence in treatment
  - D. Following federal guidelines even if they contradict ethical codes
- 

**12. The NAADAC code of ethics suggests which approach when dealing with clients mandated to counseling services?**

- A. Explaining confidentiality limits after beginning counseling
  - B. Discussing legal and ethical confidentiality limits before starting counseling
  - C. Sharing all information with supervision without client consent
  - D. Providing limited information on consequences of refusing services
- 

**13. What does the term 'person-first language' refer to in the context of reducing stigma associated with substance use disorders?**

- A. Using terms like 'substance user' to shift focus
  - B. Referring to individuals as 'people with substance use disorder'
  - C. Preferring clinical terminology over layman's terms
  - D. Emphasizing substance use as a personal choice
- 

**14. Why might coercion in addiction treatment be considered ethical according to some experts?**

- A. It ensures patient autonomy is respected at all costs
  - B. It may effectively prevent harm and promote patient recovery
  - C. It shifts the responsibility of treatment success to the client
  - D. It reduces the potential legal issues associated with treatment
- 

**15. What key aspect do ethics codes typically share when addressing the balance between ethics and the law in substance use counseling?**

- A. They prioritize legal obligations over ethical considerations
  - B. They often prohibit actions that might be required by law
  - C. They require an integration of ethical decision-making with legal compliance
  - D. They allow counselors to bypass certain legal requirements if unethical
- 

**16. Which of the following ethical principles is emphasized when considering the use of telehealth in substance use treatment?**

- A. Explaining challenges and limits to services, particularly confidentiality
- B. Providing a verbal consent without documentation

- C. Focusing solely on the technological conveniences offered
  - D. Assuming pre-existing consent applies to telehealth
- 

**17. In the context of substance use treatment, 'diminished capacity' is specifically concerned with:**

- A. An individual being unable to legally give consent but still participating
  - B. A client's temporary inability to fully understand consent elements
  - C. Complete inability to communicate preferences about treatment
  - D. Capacity differences based on specific substance use disorders
- 

**18. One primary difference between HIPAA and 42 CFR Part 2 is:**

- A. Both address confidentiality but HIPAA doesn't apply to substance use records
  - B. 42 CFR Part 2 offers broader confidentiality protections specific to SUD
  - C. HIPAA provides stricter guidelines around electronic transmissions
  - D. 42 CFR Part 2 does not require informed consent for information disclosure
- 

**19. When resolving an ethical dilemma, what initial step should a professional take according to the NASW model?**

- A. Develop an action plan based on personal insights
  - B. Identify and rank ethical principles involved
  - C. Determine whether an ethical issue or dilemma exists
  - D. Seek immediate supervision or consultation
- 

**20. What is a key consideration when facing dual relationships in substance use settings?**

- A. Ensuring direct communication with clients about potential conflicts
  - B. Avoiding any social contact with clients at all costs
  - C. Focus solely on the professional role without exceptions
  - D. Assuming clients understand professional boundaries inherently
- 

**21. Which of the following is the first step in clarifying an ethical issue according to the Manitoba College of Social Workers (MCSW) framework?**

- A. Evaluate and list personal values and intuitions.
  - B. Identify the ethical problem.
  - C. Identify major stakeholders.
  - D. Consider relationships.
- 

**22. When applying the test of universality to a selected course of action, what is being assessed?**

- A. Whether the decision could be disclosed in public.
- B. Whether the same decision could be recommended to another counselor.

- C. Whether the decision affects all parties fairly.
  - D. Whether the decision aligns with personal values.
- 

**23. In the hierarchy of ethical principles, which principle takes precedence over others?**

- A. Autonomy & Freedom.
  - B. Least Harm.
  - C. Protection of Life.
  - D. Quality of Life.
- 

**24. Which ethical test asks if you would feel comfortable having your action plan become known to others?**

- A. Universality Test.
  - B. Light-of-Day Test.
  - C. Consequential Test.
  - D. Fairness Test.
- 

**25. What should a social worker do after selecting a course of action if new ethical issues arise?**

- A. Proceed with the selected action regardless.
  - B. Implement and follow up on the selected action.
  - C. Return to the beginning and reevaluate each step of the decision-making process.
  - D. Ignore the new ethical issues if they appear minor.
- 

**26. Which factor is essential for professionals in substance use treatment to demonstrate when working with historically marginalized clients?**

- A. A skill in minimizing biases through silence.
  - B. An awareness of their own biases and stereotypes.
  - C. Ignoring the worldviews of culturally diverse clients.
  - D. Relying solely on personal experience when addressing cultural diversity.
- 

**27. The NAADAC Code of Ethics requires addiction professionals to deliver services that are:**

- A. Solely based on personal cultural experiences.
  - B. Culturally-sensitive by gaining relevant multicultural knowledge.
  - C. Limited to standardized protocols for all clients.
  - D. Focused exclusively on the client's technical problem.
- 

**28. When considering microaggressions, which impact can they have on individuals?**

- A. Increased rates of creativity and positivity.
- B. Physical health benefits, such as improved sleep.

- C. Increased rates of depression and prolonged stress.
  - D. Improved communication skills and confidence.
- 

**29. Ethical decision-making in substance use treatment should prioritize:**

- A. Agency policies over the ethical principles of the profession.
  - B. Legal guidelines at the expense of personal values.
  - C. The ethical principles prioritized by the profession's moral code.
  - D. Avoidance of consultation to enhance individual responsibility.
- 

**30. What role does cultural humility play in the treatment of substance use disorders?**

- A. Reinforcing existing stereotypes for efficiency.
  - B. Promoting microaggressions as teaching tools.
  - C. Facilitating an open and inclusive environment.
  - D. Ensuring decisions are made solely by one individual.
